PERSONAL CARE
Visual Effects

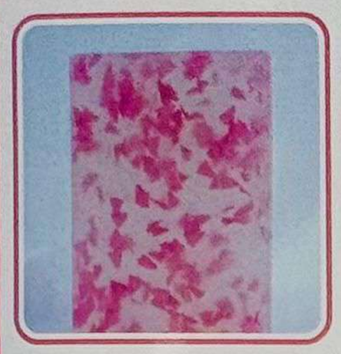

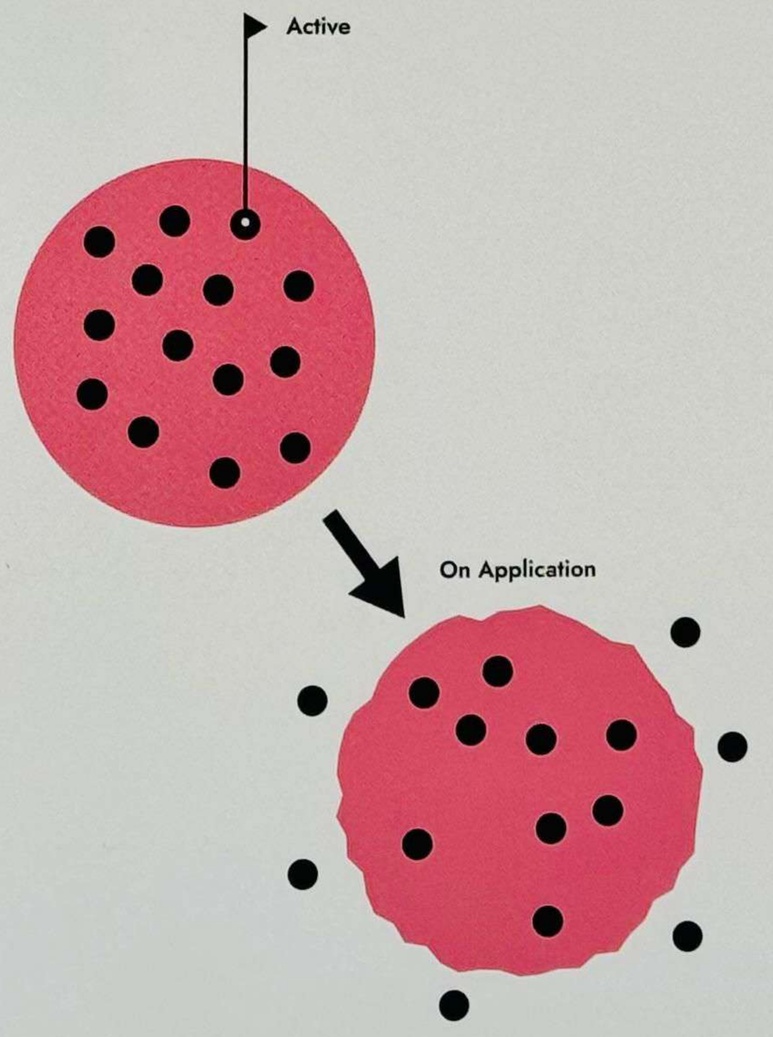

Umang Global Group is the manufacturer and supplier of a diverse range of Ingredients, Edible decorative items and encapsulated solutions for various segments, with 40+ years of experience and expertise. with GMP approved classified facilities, an excellent qualified R&D team, and well-equipped in-house QC capabilities.

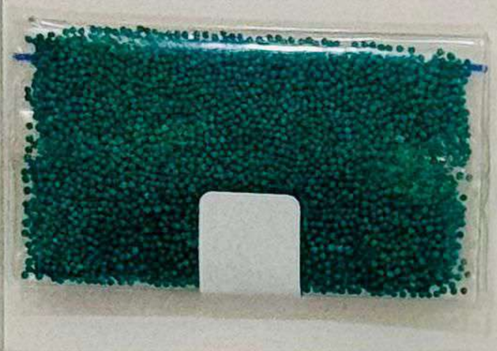

We cater to various segments like Functional foods, Bakery, Nutraceuticals, Pharmaceuticals, Personal care, and Home care.

At Umang Global , we revolutionize the beauty and wellness industries with exceptional Products. Our innovative technology empowers you to create unparalleled products that cater to the unique needs of your customers, paving the way for extraordinary experiences. Our Products are not just ingredients; they are exquisite work of art that add visual appeal to your products. With a wide range of colours and sizes, our products create a captivating sensory experience that enhances the overall appeal of your products.

Sprayspheres SC

Sprayspheres SC, versatile carrier beads for personal care, providing visual effects and release actives on rubbing.

SC-GR-VE-1413-S

Hard brittle free-flowing Vitamin E encapsulated small-sized green colour dissolvable beads.

Particle size: 0.6-0.8mm

SC-GR-ALO-1407-M

Hard brittle free-flowing Aloe vera extract encapsulated medium-sized green colour dissolvable beads.

Particle size: 0.8-1.4mm

SC-MX-2501-L

Hard brittle free-flowing large-sized mix coloured encapsulated dissolvable beads.

Particle size: 1.4mm-2.0mm

SC-RE-1205-VS

Hard brittle free-flowing small-sized red coloured very encapsulated dissolvable beads.

Particle size: 0.3-0.6mm

SC-BK-P-1751-S

Hard brittle free-flowing small-sized pearly black colored encapsulated dissolvable beads.

Particle size: 0.6-0.8mm

SC-BL-4023-VVS

Hard brittle free-flowing very very small-sized blue coloured encapsulated dissolvable beads.

Particle size: 0.2-0.3mm

SC-GO-1804-L

Hard brittle free-flowing large-sized golden coloured encapsulated dissolvable beads.

Particle size: 1.4mm-2.0mm

Sprayspheres SM

Sprayspheres SM, Versatile carrier beads for personal care, providevisual effects and release actives on application. It is the vegan alternative of lactose, made up of mannitol.

SM-OR-PAP-9205-M

Free-flowing medium-sized orange-coloured Papaya-encapsulated mannitol dissolvable beads.

Particle size: 0.8-1.4mm

SM-BL-1101-S

Free-flowing small-sized blue-coloured encapsulated mannitol dissolvable beads.

Particle size: 0.6-0.8mm

SM-PI-VE-1602-M

Free-flowing medium-sized pink-coloured Vitamin E encapsulated mannitol dissolvable beads.

Particle size: 0.8-1.4mm

SM-BK-CH-1753-M

Free-flowing medium-sized black-coloured charcoal encapsulated mannitol dissolvable beads.

Particle size: 0.8-1.4mm

Sprayspheres SH

Sprayspheres SH, specially formulated for products requiring intense colour, contains 25-50% pigments. They are typically utilized in product where vibrant colours are essential.

SH-PI-1602-S

Free-flowing small-sized pink-coloured dissolvable beads.

Particle size: 0.6-0.8mm

SH-BL-1101-S

Free-flowing small-sized blue-coloured dissolvable beads.

Particle size: 0.6-0.8mm

Actifilms

Encapsulated HPMC-based films vanish upon rubbing and quickly disintegrate under pressure. They come in various sizes, shapes and colors, mainly used for oral care products.

AF-SQ-WH-ME-4501

Semi-transparent menthol encapsulated white colour square shape thin HPMC films, soluble in water.

AF-HE-RE-4021

Semi-transparent heart-shaped red colour thin HPMC films, soluble in water.

AF-ST-GO-4002

Semi-transparent star-shaped golden colour thin HPMC films, soluble in water.

AF-MK-GO-4013

Semi-transparent monkey-shaped golden colour thin HPMC films, soluble in water

Surprise Spheres SS

Surprise Spheres are magic beads that change colour upon application. They are made with a high pigment load and then coated to create that special colour-changing effect.

SS-WH-BK-3513-VS

Free-flowing white to black colour changing very small size beads.

Particle size: 0.3-0.6mm

SS-WH-BL-3524-VS

Free-flowing white to blue colour changing very small size beads.

Particle size: 0.6-0.8mm

Luster Dust

Shining dust particles are made up of mica and are available in various colours ,used to enhance the product's visual.

LD-GO-8162

Golden colour shining dust particles, insoluble in water.

LD-NPI-8101

Pink colour-shining dust particles, insoluble in water.

LD-GR-12646

Green colour-shining dust particles, insoluble in water.

LD-MSM-8261

Silver colour shining dust particles, insoluble in water.

LD-BL-12648

Blue colour shining dust particles, insoluble in water.

LD-PU-8121

Purple colour shining dust particles, insoluble in water.

LD-YE-3101

Yellow colour shining dust particles, insoluble in water.
